**The Role of Developing Islamic Education Methods to Increase the Citizenship's Values in the Primary Schools according to Teacher's point of View (in Third Irbid Educational Site)**

*Fatima M. Sroor and Mohammad N. Al-Azzam\**

**ABSTRACT**

This study aims to uncover the role of developing Islamic education methods to increase the citizenship's value, in the primary schools according to the teachers' point of view (in third Irbid educational site).

This study has been answered the main questions:

This study aims to uncover the role of developing Islamic education methods to increase the citizenship's value. The sample of the study contain (55) female and male teachers. The result shows the degree of developing the Islamic educational methods in primary stage were medium (3.36).

The study also shows there are statically differences to the certificate or the teacher and the years of experiences. The researchers urge to develop the value of good citizenship and try to enforce them in the students through Islamic educational and take care with university experiences in the field.

**Keywords:** Islamic Education Methods, Values, good citizenship, primary schools.
