Co-operative Schools' Headteachers Point of View Regarding the Problems Which They Face During Student Teaching Practice at Mutah University

*Mohannad Khazar**

ABSTRACT

This research aimed to identify problems which face co-operative schools' head teachers During Student Teaching Practice at Mu'tah University. In addition, it aimed at identifying any significant differences regarding the research variables, namely: school gender, number of student teachers at the school and the distance between the school and the university. The research sample consisted of (101) schools with an average of (81%) of the population of the research, the used instrument was a questionnaire consisted of (45) items.

Findings showed three domains of problems queued in terms of its' importance as follows: problems related to student teaching Practice, problems related to student teachers and problems related to student teachers' supervisor. In addition, findings showed no significant differences regarding school gender variable and significant differences regarding number of student teachers at the school and the distance between the school and the university variables. In the light of the research findings, a number of recommendations were stated.

Keywords: Co-operative Schools, Head teachers, Student Teaching Practice, Mutah University.
