The Ulama's Methodology in Proving the Definity in the Fundamental Rules

*Al-Abed Khalil Abu Eid, and Abd Al-Jalil Dhamrah**

ABSTRACT

This study handles the Ulama's methodology in proving the definity in the fundamental rules. Through research and investigation and following the Ulama's views, it was clear that there are two methodologies that were used to achieve the definity in the fundamental rules: the deduction methodology, and using the mind to find the evidence. Therefore, we have simplified the views in each of them so as to declare the characteristics of each of them.

In addition, we have discussed through evidence the renewal claims in the rules of jurisprudence (fiqh) roots, as well as the reasons claimed by the theorists of this idea to justify its use, and we concluded that it is a project that aims to divestiture the roots' rules but not for renewal.

* Faculty of Sharia'h, University of Jordan; and Al-Yarmouk University. Received on 25/6/2002 and Accepted for Publication on 5/4/2004.
