*Ahmad F. Abu Hazeem **

ABSTRACT

This research aims at examining the term of perverse interpretation and discussing of conditions, controls and determinates of the accurate interpretation. Furthermore, the research aims at defining the Ismailia Sect, whereas it is one of the sects that have deviated intellectual tendencies. Ismailia sect derived its thoughts and beliefs from various doctrines and several altered religions where Ismailia utilized the hidden or esoteric interpretation for the Book of Allah as a vicar to pass on its plans and agendas without taking into consideration the accredited and accepted interpretation rules while believing that the Imamhood is the primary pillar of all Islam's pillars. Furthermore, present research aims at citing some applied samples of Ismailia deviated interpretation and challenge them such as: their interpretation of theological issues, prophethood and miracles, resurrection and people assembly, and their interpretation of prayers, fasting, Zakat, pilgrimage and other rejected interpretations for their deviation from what nation all believe with.
